& vocal mic

Note:

The Balsam Range band is extremely dedicated to always offering quality sound and a professional performance. It takes an aware approach, a partnership attitude, and a cooperative direction by the promotional staff, production staff, and the band to make this happen consistently. To this end, Balsam Range respectfully requires the following considerations for the PA system and sound control.

Mics:

9 (nine) professional quality microphones placed on adjustable boom stands and 2 (two) direct-line boxes for 5 (five) band members in the configuration as listed above.

Monitors:

Provide individual monitor speakers for each of the 5 (five) positions...placed in front of the person/space and microphones/stands.
